

Architop® Colours

The art of
harmony

^{EN} Architop® can be made using Colour Pack-C dye combined with the neutral Colour Hardener, or using the already coloured powders of the colour hardener. In this table Architop®'s standard shades are divided by colour line according to Ideal Work's colour scheme. Each colour can be combined tone-on-tone horizontally or with different colour groups vertically.

The colours listed in this page are only indicative; Ideal Work authorised applicator will create an ad hoc sample for you to see and touch the colour and finish you would like to choose.

^{IT} Architop® può essere fatto usando il colorante Colour Pack-C unito al Colour Hardener neutro, oppure usando le polveri già colorate del corazzante. In questa tabella colori standard sono divisi per linea cromatica secondo lo schema colori Ideal Work. Ogni colore è combinabile tono su tono in orizzontale e tra i differenti gruppi di colore in verticale.

I colori riportati in questa pagina sono solo indicativi, sarà poi l'applicatore autorizzato Ideal Work che realizzerà un campione ad hoc per poter vedere dal vivo colore e finitura.
